

# ERIC LOZANO FÉRRIZ

Barcelona, Spain  
ericlozano98@gmail.com  
(+34) 661 96 48 72

## EDUCATION

Artificial Intelligence Master  
Universidad Internacional de Valencia  
2021 - 2022 Valencia

Computer Engineering Degree  
Universitat Autònoma de Barcelona  
2016 - 2020 Barcelona

## EXPERIENCE

Senior AI Engineer  
Hubtype  
September, 2020 - Now Barcelona

- Utilized AI frameworks including **LangChain** (for LLM orchestration), **LangGraph** (for agent workflows), **OpenAI Agents SDK** (for agent integration), and **Pinecone** (for vector indexing) to develop advanced AI applications.
- Managed deployment of AI solutions on cloud platforms such as **AWS** (ECS, S3, SageMaker, Bedrock) and **Azure OpenAI**.
- Delivered **AI Agents** fully integrated with Hubtype's ecosystem, enabling chatbots to access multiple tools including the **Knowledge Base**, **helpdesk**, and **human handoff**. Developed support for **custom tools**, allowing clients to connect APIs or integrate their own MCPs. These Agents delegate complex decisions to AI, reduce fallback rates, and significantly enhance chatbot performance.
- Led the development of a **Knowledge Base product**, creating pipelines to extract data from a variety of file formats (PDFs, Excels, DOCX, TXT, and more) and scraping client websites to enable precise generative AI responses.
- Built features that allow clients to **customize AI provider, model choice, prompt instructions, and chunk size**, with prompt orchestration handled via **LangGraph**.
- Implemented AI features to assist **helpdesk agents**, including **real-time translation, case summarization, and automatic detection of contact reasons**.
- Transitioned **intent detection** from manual sample-based training to zero/few-shot classification using LLMs, simplifying and accelerating client workflows.
- As the **sole AI expert**, took full ownership of AI-related decisions alongside the CTO, defining AI strategy and leading all AI projects within the company.
- Contributed to Hubtype's **growth and successful acquisition**, with AI playing a central role in the company's value proposition.

## LANGUAGES

Spanish Native  
Catalan Native  
English B2

## SKILLSET

Large Language Models (LLMs)

LangChain LangGraph

OpenAI Agents SDK TensorFlow

PyTorch Transformers spaCy

Django Streamlit Terraform

Docker Git AWS SageMaker

AWS ECS AWS S3 AWS Bedrock

Azure OpenAI Pinecone

## PROJECTS

News Analyzer  
Master's Degree Final Project

Developed as part of my master's thesis, this NLP application analyzes news articles to assess category, detect fake news, identify clickbait headlines, and extract named entities. The project highlights my skills in text classification and information extraction using transformer-based models.

Models:

- elozano/bert-base-cased-news-category
- elozano/bert-base-cased-fake-news
- elozano/bert-base-cased-clickbait-news
- dslim/bert-base-NER

- Regularly conduct **internal workshops and presentations** to share AI knowledge across teams, fostering a deeper understanding and better utilization of AI tools.
- 

## Machine Learning Engineer

Serimag

📅 September, 2019 – July 2020      📍 Barcelona

- Developed deep learning models to automate **bank document classification, segmentation, and information extraction**.
- Applied **computer vision algorithms** to process scanned documentation.
